

OTPme - Feature #46

add ssh-token support for authentication with OTPme daemons

04 July 2015 03:01 - The 2nd

Status:	In Bearbeitung	Start date:	04 July 2015
Priority:	Normal	Due date:	
Assignee:		% Done:	85%
Category:		Estimated time:	0:00 hour
Target version:	OTPme 0.3		
Description			
this feature is implemented using an ssh token that holds the public key of the user. otpme command line tools use a running ssh-agent/gpg-agent to authenticate against otpme daemons.			
Subtasks:			
Feature # 47: add support for a second factor token (e.g. HOTP) to add some additional ...			In Bearbeitung
Feature # 67: Implement deployment of SSH public keys			In Bearbeitung
