OTPme - Feature #48

add ldap server support

05 July 2015 13:12 - The 2nd

Status:	In Bearbeitung		**Start date:**	15 April 2016
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	60%
Category:			**Estimated time:**	0:00 hour
Target version:	OTPme 0.3			

Description

OTPme should support ldap as access protocol to it's users, groups etc.

- add ldap support for different object classes as extensions
- add support for units (ou)
- add group support (memberUid)
- ...

Subtasks:

Feature # 72: Allow LDAP authentication to different accessgroups	**In Bearbeitung**

History

#1 - 15 April 2016 23:39 - The 2nd

- % Done changed from 30 to 60

This feature is implemented using python-ldaptor. Users can authenticate with any token that supports clear-text passwords (e.g. OTP or static passwords). OTPme ACLs are used to restrict access to LDAP attributes. Currently we support LDAP for the following objects:

- Realm/Site as DC
- Units as OUs
- Users as posixAccount
- Groups as posixGroup
