OTPme - Feature #50

Feature # 49 (In Bearbeitung): add PAM module

add support for offline tokens

05 July 2015 13:25 - The 2nd

Status:	Neu	**Start date:**	05 July 2015
Priority:	Normal	**Due date:**	
Assignee:		**% Done:**	70%
Category:		**Estimated time:**	0:00 hour
Target version:	OTPme 0.3		

Description

a token should be markable as being allowed to be used for offline logins.

- to improve security against offline attacks (e.g. a stolen notebook) tokens should only be saved encrypted
- another idea would be to use another (offline) secret when doing offline logins.   * this requires special support within the used softtoken or can be accomplished by using a second (offline) profile

History

#1 - 29 July 2015 23:03 - The 2nd

- % Done changed from 30 to 60

- basic offline support working
- current implementation needs a static part in the password/OTP that is used to encrypt the token config

#2 - 30 December 2015 02:46 - The 2nd

- % Done changed from 60 to 70
