

OTPme - Feature #66

Feature # 64 (In Bearbeitung): Implement U2F token

Allow usage of U2F token as second factor token with "password" tokens

17 December 2015 19:59 - The 2nd

Status:	In Bearbeitung	Start date:	17 December 2015
Priority:	Normal	Due date:	
Assignee:	The 2nd	% Done:	90%
Category:		Estimated time:	0:00 hour
Target version:	OTPme 0.3		
Description <ul style="list-style-type: none">• The first factor should be a static password that can be used to encrypt offline token and session• The second factor would be the U2F token			

History

#1 - 18 December 2015 22:25 - The 2nd

- % Done changed from 0 to 50

- Implemented usage of U2F tokens as second factor token with static password tokens
- Currently this can only be used with the OTPme PAM module
- Offline authentication does not work yet

#2 - 31 December 2015 14:32 - The 2nd

- Status changed from Neu to In Bearbeitung

- % Done changed from 50 to 90

- Implemented offline logins with U2F tokens
 - Extended the OTPme PAM module to support "nullok" to allow usage of U2F token without password
