

OTPme - Feature #72

Feature # 48 (In Bearbeitung): add ldap server support

Allow LDAP authentication to different accessgroups

15 April 2016 23:42 - The 2nd

Status:	In Bearbeitung	Start date:	15 April 2016
Priority:	Normal	Due date:	
Assignee:	The 2nd	% Done:	60%
Category:		Estimated time:	0:00 hour
Target version:	OTPme 0.3		
Description			
The current implementation allows to specify the OTPme client name as DC e.g. dc=otrs,dc=domain,dc=intern where "otrs" is the client name. This way we can differentiate between different accessgroups with all its features.
