

OTPme - Feature #78

Feature # 39 (Neu): add cluster support to OTPme

Implement master node failover

07 August 2018 14:28 - The 2nd

Status:	Neu	Start date:	07 August 2018
Priority:	Normal	Due date:	
Assignee:	The 2nd	% Done:	0%
Category:		Estimated time:	0:00 hour
Target version:	OTPme 0.3		
Description <ul style="list-style-type: none">• The master node owns the virtual cluster IP• All nodes should send/receive heartbeat messages to detect if a node goes down• The master node failover should happen automatically<ul style="list-style-type: none">◦ How to detect which cluster part has quorum?• A manual master node failover should be possible (e.g. for maintenance)
